Disposable Coffee Cups & Lids

When it comes to serving a hot drink, our Black Ripple Wall Cups are an ideal solution. Unlike a smooth surface cup, this cup is designed with a ripple effect that works as an insulator which does not let the heat pass through the walls on the outside of the cup, and makes it easier for the consumers to hold it without having to need for a cup sleeve. The ripple wall enhances the grip while reducing the chances of slipping and spilling coffee or any hot beverage. The perfect and safe solution for cafes, coffee shops, kiosks and bistros. With a stylish ripple design these not only perform well but look stylish and modern also.

We can also supply compostable cups and lids as well as different colours of the Ripple Cups & lids.

Other sizes are also available.
